Barr's "Gold Medal" Daffodils

AWARDED

Ninety-three Gold Medals and Four Silver Challenge Cups and Two R.H.S. Silver Cups for New Seedling Daffodils.

Also many First-class Certificates and other high awards.

We have been awarded for New Seedling Daffodils—

The Engleheart Challenge Cup by the Royal Horticultural Society as First Prize for 12 Best Seedling Daffodils not in commerce.

The Walter Ware Challenge Cup for the Best New Triandrus Hybrids.

The R.H.S. Silver Standard Cup for the best 12 New Seedling Daffodils.

R.H.S. First Prize for the 12 Best Seedling Daffodils in Commerce.

Our Exhibits of Daffodils received the following High Awards for Excellence during the Spring of 1929 :

- Mar. 12th. Gold Medal, awarded at the Torquay Spring Show.
- April 3rd. Gold Medal and Silver Challenge Cup awarded by the North of England Horticultural Society.
- „ 10th. Gold Medal, awarded at the Falmouth Spring Show.
- „ 16th. Silver-Gilt Banksian, awarded by the Daffodil Show Committee of the Royal Horticultural Society, London.
- „ 19th. Gold Medal, awarded by Tewkesbury Daffodil Society.
- „ 23rd. Silver-Gilt Banksian, awarded by Royal Horticultural Society, London.
- „ 24th. Gold Medal, awarded at the Glamorgan Spring Show.
- „ 24th. Gold Medal, awarded by the Midland Daffodil Society, Birmingham.
- „ 29th. Gold Medal, awarded by the Admiralty Horticultural Society.
- May 7th. Gold Medal, awarded by the Royal Horticultural Society, London.

New Seedling Nerines

Eight Silver and Silver-Gilt Medals Awarded by the R.H.S.

The most beautiful and easiest grown of Autumn-flowering bulbs for a cool greenhouse. For descriptive list and full cultural directions, see page 31.

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

Soil and Manures.—Daffodils will thrive in any well-cultivated garden soil, but prefer a good deep well-drained loam. In preparing the ground for planting, dig deeply, and if well-rotted stable or cow manure is available, or the material from an exhausted hot bed, this may with advantage be dug in 15 to 18 inches deep so as not to be in immediate contact with the bulbs. Fresh stable manure should on no account be used. Where cow or well-rotted stable manure is not available a good compound manure should be used such as our *Phytobroma* (which contains, in suitable proportions, Steamed Bone Flour, Sulphate of Potash, Superphosphate of Lime, etc.) forked into the ground before or at planting time at the rate of 3 oz. per square yard; this is a perfectly safe complete manure, suitable for heavy or light soils, and the best general manure for all bulbs, encouraging vigorous root action and subsequent good bloom.

In February, Daffodil Beds should be hoed and again given a surface dressing of our *Phytobroma* at the rate of 3 oz. to the square yard. In the case of bulbs which have not been lifted we recommend a surface dressing, well hoed in, of *Phytobroma*, in October or November, and again in February. These dressings should also be given to Daffodils naturalised in grass; soil fertility must be maintained if bulbs are to continue to flourish and flower well. *For Prices of Manures see our General Bulb Catalogue.*

Time and Depth to Plant.—Daffodils are best planted as early in Autumn as possible (especially Poeticus varieties), although we have planted the stronger growing sorts as late as the end of December and obtained excellent blooms. Depth of planting depends on the size of the bulbs; a good rule to follow is to cover the bulb with soil once and a half to twice its own depth, measuring the bulb from base to shoulder, on heavy and medium soils, and at least twice its own depth on light soils. Thus, a Daffodil bulb measuring 2 inches from base to shoulder should be covered with 3 to 4 inches of soil. Some of the stronger growing sorts such as Emperor, Empress, *Incomparabilis* Yellow Standard and *Barrii* *Conspicuus*, also the Poeticus varieties, may with advantage be planted deeper.

Freshly dug soil should be allowed to stand vacant two or three weeks before planting, or some of the bulbs may sink below their proper depth, causing irregularity in growth and flowering.

Naturalising Daffodils in Grass, etc.—All Daffodils are suitable for naturalising, but in heavy soils, preference should be given to the stronger growing sorts. To produce the best effect Trumpets, Chalice-cup, and Poeticus varieties should be grouped separately; we offer mixtures of these groups separately on page 5. Daffodils are admirably adapted for grassy slopes and banks, where they should be freely planted.

In planting bulbs *in grass*, **Barr's Bulb Planter** (*see* General Bulb Catalogue) should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting place for the bulb, while by its use *the grass is not in the least disturbed*. Planting is best done after the first autumn rains. If the ground is poor, a compost of fresh soil with *Phytobroma* (1 lb. to a bushel) should be made and dropped into each hole before placing the bulb. Cut the grass as late in autumn as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Daffodils in no way affect the hay crop, which may be cut at the usual season.

CULTURE OF DAFFODILS IN POTS OR BOXES.

Daffodils should be potted in September or October in a compost of good sweet fibrous loam and well decayed cow manure or leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of steamed bone flour or 1 lb. of *Phytobroma* to every bushel of soil, which mix well together before using. The pots should be carefully washed and allowed to dry before using; new pots should be well soaked. Good drainage should be secured by placing pieces of charcoal or crocks over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed on this to ensure perfect drainage.

After potting, stand the pots or boxes outside, on a firm bottom, such as a bed of well-weathered ashes or gravel to prevent entrance of worms. They should then be completely covered with Peat Fibre, the top of the pots being 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action.

The pots or boxes should remain plunged for about twelve weeks in order that the bulbs may get well rooted, when they may be removed indoors for succession, selecting first those which bloom naturally early. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed and subjected to heat too early, before they have made sufficient root growth, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check to the young top growths from draughts or too sudden exposure to light. Weak liquid manure-water (1 oz. of *Phytobroma* to a gallon of water) may then be given once a week until they come into flower. Those that are wanted in bloom early, may, after the flower-buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from insufficient light or air.

COLLECTIONS OF DAFFODILS

FOR FLOWER BORDERS, POTS, AND BOWL CULTURE.

Barr's 25/- Collection of Daffodils for Flower Borders.

The following varieties are all beautiful in the flower border, and the selection embracing early and late varieties gives a good succession of bloom. All are suitable for pot culture and will give an equally fine display in the greenhouse or sitting-room.

ALL EXTRA STRONG SELECTED BULBS.

6 Emperor	6 Incomparabilis Lucifer	6 Leedsii Evangeline
6 Golden Spur	6 " Sir Watkin	6 Odorus Rugulosus
6 Bicolor Empress	6 " Yellow Standard	6 Poetaz Elvira
6 " Victoria	6 Barrii conspicuus	6 Poeticus ornatus
6 Madame de Graaff	6 " Fair Maiden	6 " Corinna
6 Incomparabilis E. G. Quick	6 Leedsii Amazon	6 The Pearl (double)

3 Bulbs each of the above 18 varieties for 12/6

Barr's 35/- Collection of Daffodils for Pot Culture.

The following Daffodils can be specially recommended for pot culture, and by gentle forcing a succession of bloom may be had through February and March, the selection containing early and late flowering varieties. If after flowering they are turned out of pots and carefully planted out (the ground being well watered previously, should it be dry) they will mostly flower well outdoors the following season. *For Cultural Directions see page 2, and pages 2 and 3 of our General Bulb Catalogue.*

ALL EXTRA STRONG SELECTED BULBS.

6 Emperor	6 Incomparabilis Bonaparte	6 Poetaz Elvira
6 Glory of Leiden	6 " Blackwell	6 " Jaune à Merveille
6 Alice Knights	6 Barrii Fair Maiden	6 Poeticus Cassandra
6 W. P. Milner	6 " Seagull	6 " Herrick
6 Bicolor Empress	6 Leedsii Bridesmaid	6 Argent (double)
6 " Victoria	6 " Fairy Queen	6 Campanelle Jonquil
6 Incomparabilis E. G. Quick	6 " Lord Kitchener	

3 Bulbs each of the above 20 varieties for 18/-

3 Bulbs each of 12 varieties (our selection), 10/6

Barr's 21/- Collection of Daffodils for Bowl Culture.

For growing in bowls in our Peat-fibre Mixture. *For Cultural Directions see page 3 of Bulb Catalogue.*

ALL STRONGEST SELECTED BULBS.

6 Emperor	6 Bicolor Empress	6 Barrii Fair Maiden
6 Golden Spur	6 " Victoria	6 Leedsii Fairy Queen
6 Obvallaris	6 Incomparabilis Bonaparte	6 Odorus Campanelle
6 Alice Knights	6 " E. G. Quick	6 Poetaz Alsace
6 W. P. Milner	6 Barrii Seagull	6 " Elvira

3 Bulbs each of the above 15 varieties for 10/6

 *Special Collections for Bowl Culture, Pots, or Borders, made up to any value to meet customers' requirements.*

Barr's Peat-Fibre Shell and Charcoal Mixture.

The best medium for growing bulbs in Vases, Bowls, Etc., 5/6 per bushel, 1/6 per peck.

DAFFODILS RECOMMENDED FOR FORCING.

The following varieties may be easily brought into bloom by January or February by gentle forcing. *For Cultural Directions see page 2, and pages 2 and 3 of General Bulb Catalogue.*

 In addition to the above we recommend all the Polyanthus Narcissi offered on page 26.

Daffodils and Narcissi for Naturalising.

In Woodlands, Shrubberies, Orchards, Grass, etc., and to plant for cutting.

BARR'S COLLECTIONS FOR NATURALISING.

1000 in 20 fine showy named sorts (Trumpets, Chalice-cupped, Poets, etc.)	150/-
500 in 20	75/-
100 in 10	15/-

The above Collections of Daffodils are made up from varieties specially selected as being suitable for naturalising and for cutting. They may be relied on to give a good supply of flowers over a long period.

Barr's Mixtures of Daffodils for Naturalising.

The following mixtures are specially made up by us from separate named varieties, and are greatly superior to the cheap mixtures frequently sold.

Mixed Daffodils of Many Sorts, for large plantings, naturalising and cutting, including a good mixture of **Trumpets, Incomparabilis, Barrii, Leedsii, Poets**, etc., suitable for large plantings in Grass, Woodlands, Herbaceous Borders, etc..... per 1000, 90/-; per 100, 9/6; per doz., 1/4

Trumpet Daffodils in Mixture, a splendid mixture of large Trumpet Daffodils, including **EMPEROR, EMPRESS**, etc., all suitable for naturalising... per 1000, 140/-; per 100, 15/-; doz., 2/3

Single Chalice-cup or Star Narcissi Mixed (Incomparabilis, Leedsii and Barrii varieties), the charming effect of these light graceful Daffodils, when naturalised, must be seen to be realised. For cutting they are most valuable..... per 1000, 90/-; per 100, 9/6; per doz., 1/4

Single Poet's Narcissi in Mixture, including good seedling varieties, all suitable for naturalising..... per 1000, 80/-; per 100, 8/6; per doz., 1/3

DAFFODILS & NARCISSI RECOMMENDED FOR NATURALISING.

We recommend the following varieties for planting in large quantities in grass, shrubberies, etc. They are all of robust constitution and remarkably decorative; all are suitable for maintaining a supply of flowers for cutting. Full descriptions of these sorts will be found in the body of the catalogue.

TRUMPET DAFFODILS. (See pages 10 to 15.)

Barr's New Seedling Daffodils

Including New Varieties for 1929.

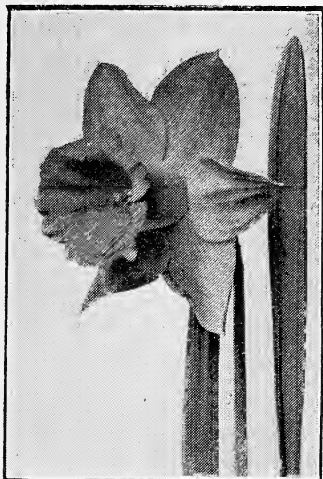

The following list comprises some of the finest New Seedling Daffodils raised by ourselves and other well-known hybridists. The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being the earliest, (7) the latest.

	each.	£	s.	d.
Aerolite (Trumpet Daffodil) (3), xxx $\frac{1}{2}$, a graceful flower, perianth primrose-yellow, overlapping and slightly reflexed, short bright yellow trumpet of elegant form, this variety is almost a Giant Incomparabilis, ht. 20 in..... per doz., 50/-		0	4	6
Basilia (Giant Leedsii) (3), xxxx, a very large bold flower of good form measuring 4 inches across, with broad white perianth and very large crown of a delicate cream colour, open and fringed at mouth, ht. 21 in.		0	15	0
Beersheba (Trumpet Daffodil) (2), xxxx, the finest White Trumpet Daffodil yet raised, a flower of perfect form, perianth large and perfectly flat, trumpet long and beautifully flanged at mouth. A flower of great size, measuring nearly 5 inches across, a vigorous grower and a grand exhibition flower, ht. 21 in. FIRST CLASS CERTIFICATE R.H.S., 1926.....		2	10	0
Carmenta (Trumpet Daffodil) (4), xxx $\frac{1}{2}$, a very beautiful flower, perianth white and broad, trumpet soft lemon, short and with a very wide open mouth, gracefully frilled at margin, ht. 15 in.....		0	15	0
Concordia (Giant Leedsii) (3), xxxx, a very refined large flower, 4 $\frac{1}{2}$ inches across, pure white campanulate perianth, long, bold crown, primrose shaded sulphur, ht. 16 in.		0	10	6
Crimson Braid (Barrii) (5), xxx, solid white perianth, broad and rounded, slightly inclined to reflex; large flat yellow crown with deep well defined margin of crimson-scarlet, ht. 19 in.....		0	7	6
Cyane (Trumpet Daffodil) (4), xxxx, flower of beautiful form and good substance, perianth white, smooth and imbricated, trumpet soft primrose-yellow, ht. 16 in.....		0	10	6
Eskimo (Trumpet Daffodil), xxxx, a very beautiful flower of great substance, with erect broad white perianth; the trumpet opens pale creamy primrose, quickly developing to snowy white, and is well expanded at brim. AWARD OF MERIT, R.H.S., 1927.....		0	12	6

DAFFODIL TAMORA
(see page 13).

(B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

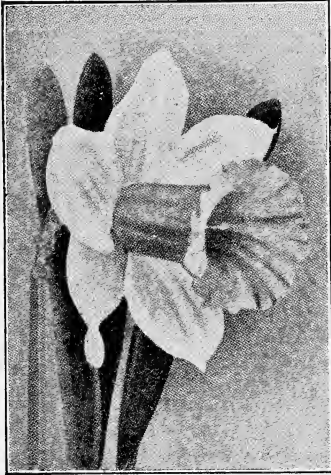

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone flour or basic slag, or our Phytobroma may be used (for full directions, see our General Bulb Catalogue).

† Ailsa (3), xxx $\frac{1}{2}$, a beautiful chaste flower, perianth pure white, trumpet white, large and bold with deeply frilled recurved margin. AWARD OF MERIT R.H.S.; ht. 20 in.....	per doz.	each.

WEARDALE PERFECTION.

INCOMPARABILIS BEDOUIN.
Example of Flower in Division II.

DIV. II.—INCOMPARABILIS.

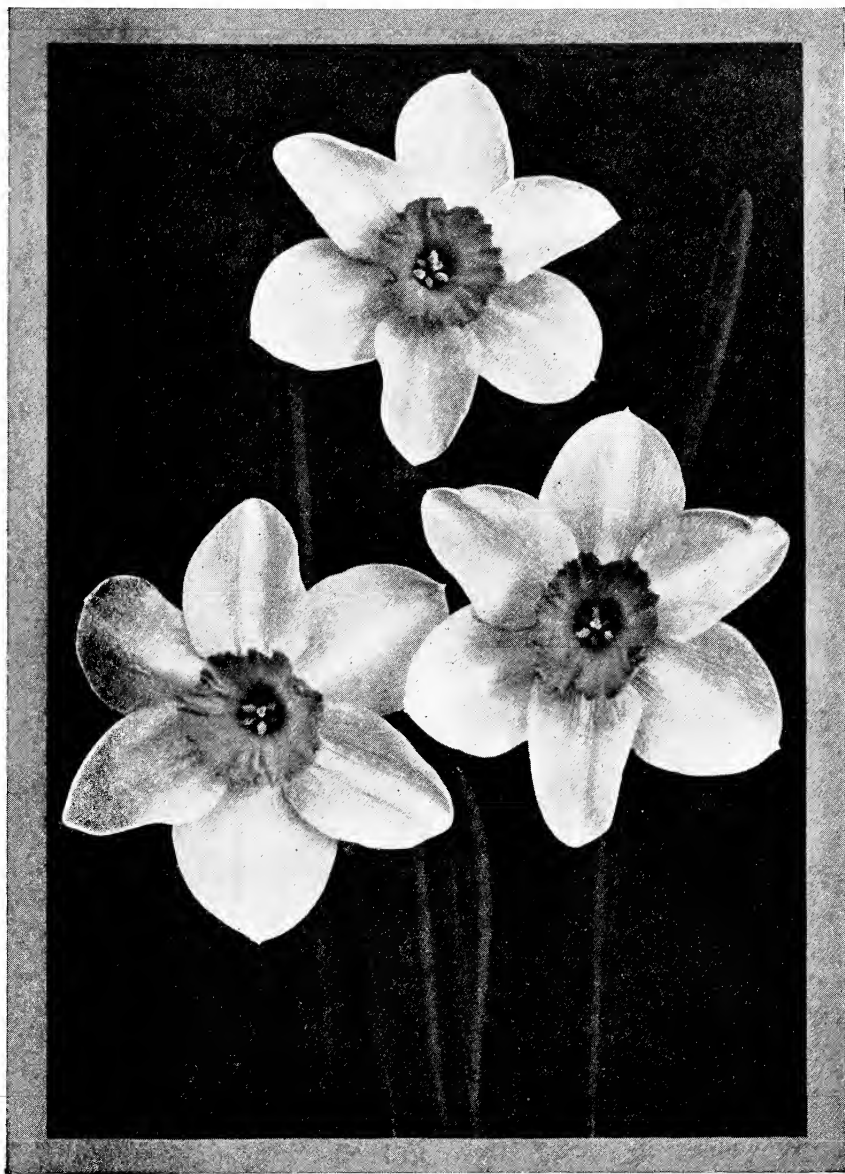

LARGE CHALICE-CUPPED DAFFODILS OR STAR NARCISSI.

Distinguishing Character.—Cup or crown measuring from one-third to nearly the length of the perianth segments.

All having yellow or white perianth and yellow or red-stained cups.

These beautiful Star Narcissi commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see pages 2 and 3 of our General Bulb Catalogue). They make charming pot plants, while in beds and borders they are very showy, and naturalised in grass they produce a graceful effect. We illustrate *Bedouin* as an example of a flower in this Division.

BARRII CHALLENGER.

Example of a Flower in Division III.

DIVISION III.—BARRII.	
Short-Cupped Daffodils, or Star Narcissi.	
Distinguishing Character.—Cup or crown measuring less than one-third the length of the perianth segments.	
All having yellow or white perianth and yellow or red-stained cups.	
The chaste beauty of these shorter-cupped Narcissi is the more highly appreciated when the cut flowers are seen arranged in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them all more or less valuable exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.	
‡ Albatross (4), xx½, fine for cutting, perianth white, cup pale citron-yellow, frilled and edged orange-red, beautiful, ht. 24 in. It may be gently forced. FIRST-CLASS CERTIFICATE R.H.S.	per doz. each. s. d. s. d. 25/- 3 6 0 4

Circular with full particulars on application. †

DIVISION IV.—LEEDSII.

Eucharis-Flowered Silver-White Star Narcissi.

Comprising all Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth segments and cup or crown white, cream, buff-orange, apricot or pale citron.

LEEDSII MERMAID.

In the working out of the new classification, the revising committee felt that it would be unwise to break up this section and distribute it among the Incomparabilis and Barrii forms, seeing how distinct a "colour section" it was, and how well known to all Daffodil growers.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their graceful fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

TRIANDRUS ALBUS ON ROCKWORK.

DIVISION V.—TRIANDRUS AND TRIANDRUS HYBRIDS.

Under this division are placed *Triandrus* varieties and all hybrids obviously containing *Triandrus* blood.

The introduction of *Triandrus* blood in hybridising has resulted in such a very distinct group of hybrids that the Classification Committee of the R.H.S. deemed it advisable to make one section of them. For grace and beauty they are unsurpassed. We recommend a situation partly shaded by trees, and if a little very fine dwarf grass seed (see p. 2 of Cover of our General Bulb Catalogue) is sown amongst them the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

NARCISSUS TRIANDRUS.

The *Cyclamen*-flowered *Daffodils* with reflexing perianth.

THE DAINY LITTLE "ANGEL'S TEARS" DAFFODIL (*Triandrus albus*) was found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot plants (three or more bulbs in a pot), and grown thus should be given cold frame culture.

Established on rockwork they form a picture full of grace and beauty. *They prefer shade, a gritty soil, well-drained position and no manure.*

†**Triandrus albus** (3), an exquisitely beautiful little species, appropriately called per doz. each the "Angel's Tears" Daffodil; it is of slender growth, and produces a cluster of s. d. s. d. elegant little creamy white flowers with globular cup and perianth reflexing as in the *Cyclamen*, ht. 7 in. *As the collected bulbs have to be taken up while the foliage is still green, a few may possibly not bloom the first season: the bulbs should therefore be left undisturbed to become established.....* Collected bulbs per 100, 12/6 1 9 0 2

Barr's Improved Peat-fibre, Shell and Charcoal Mixture.

The best medium for growing bulbs in Vases, Bowls, Jardinets, etc., 5/6 per bushel; 1/6 per peck.

Narcissus Triandrus—continued.

per doz. each.
s. d. s. d.

TRIANDRUS CALATHINUS.

†**Triandrus calathinus** (3). One of the most beautiful little Daffodils in existence. The flowers which are produced in drooping clusters of two or three, are snowy white, and more than twice the size of *Triandrus albus*, with long goblet-shaped crown prettily fluted; the foliage has a curious habit of curling over, ht. 7 in. For pot culture and rockwork it is a perfect gem. This beautiful little Daffodil thrives best in a mixture of leaf mould, heath soil and coarse sand, with just a little bone flour added; no other manure should be given. The late Mr. Peter Barr collected this rare Daffodil some years ago on the Isle of Glénan, Brittany, the collecting being attended with a good deal of risk. Unfortunately it is no longer to be found there, the sea having washed away all trace of it, but it is readily raised from seed, and we now offer strong flowering cultivated bulbs.

†**Triandrus concolor** (true), (3), bearing clusters of dainty fragrant flowers of similar form to *Triandrus albus*, but of a uniform full soft yellow, a rare and beautiful little Daffodil, ht. 7 in. 25 0 2 3

†**Triandrus pulchellus** (4), a very beautiful little daffodil with elegant clusters of flowers with primrose perianth and creamy white cup, ht. 9 in. 10 6 1 0

NARCISSUS TRIANDRUS HYBRIDS.

§†**Queen of Spain** (3), xxx, a wild hybrid discovered by the late Mr. Peter Barr in Spain. One of the most beautiful, distinct, and graceful Daffodils, and recommended either for bedding, pot or bowl culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, and sometimes in form of trumpet, but all are of a uniform, delicate canary-yellow, with a gracefully reflexing perianth, ht. 12 in. Naturalised in grass under trees this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in the Peat-fibre mixture, and grown thus affords an artistic decoration for the sitting-room.

DIV. VI.—CYCLAMINEUS and CYCLAMINEUS HYBRIDS.

NARCISSUS CYCLAMINEUS.

Cyclamineus (1), the Yellow Cyclamen-flowered Daffodil. This beautiful little daffodil was found by the late Mr. Peter Barr, in Spain and Portugal, at the margin of mountain streams and in flooded meadows adjoining; the moister the situation the finer were the blooms. It is the earliest of all Daffodils, flowering from the middle of February to early March, and is a charming elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed like a Cyclamen. A valuable little species for pot-culture, edgings, rock work, and to naturalise in damp spots in the rock garden, in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil and should be left undisturbed for years, ht. 6 in. No manure should be given. **FIRST-CLASS CERTIFICATE R.H.S.** For pot culture and exhibition the larger size bulbs should be ordered.

NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.

New Hybrids of *Poeticus Ornatus* × Best Forms of Polyanthus Narcissi.

POETAZ ELVIRA.

A fine race of Daffodils, resulting from a cross between *Poeticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the *Poeticus* being the seed-bearing parent. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant; they are much finer than the old *Polyanthus Narcissi*, and have the advantage of being much hardier. In pots, bowls, or the flower border they are very decorative, while the flowers are highly prized for cutting. They can easily be brought into bloom early by gentle forcing.

DIVISION IX.—POETICUS—TRUE POET'S NARCISSI.

These "Poet's Daffodils" or *Narcissi* all have snowy white perianth segments or petals, and a small flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, sometimes almost self scarlet. All are sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced. As border plants and naturalised in grass by themselves the Poet's *Narcissi* produce a lovely effect.

👉 **Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.**

DIVISION XI.—VARIOUS SPECIES AND HYBRIDS.

Distinct forms which cannot be classed under any of the foregoing divisions.

NARCISSUS BULBOCODIUM (CORBULARIA).

The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration.

LARGE SULPHUR HOOP PETTICOAT DAFFODIL.

Large Sulphur Hoop Petticoat (Bulbocodium citrinus) (3), native of the Pyrenees, very beautiful pale citron-yellow, ht. 6 to 8 inches; delights in a dampish sandy peat soil; no manure should be given. *The collected bulbs we offer having been taken up while in growth will not all bloom the first season: they should therefore be planted where they may be left undisturbed to become established.*

Home-grown bulbs ,, 12/6 1 9 0 2
Extra strong Home-grown bulbs ,, 17/6 2 6 0 3

WHITE HOOP PETTICOAT.

White Hoop Petticoat (Bulbocodium monophyllum or Clusii) (1), native of N. Africa, producing in winter little snowy white flowers of exquisite beauty; grow in pots, in frames, or at the foot of hot dry walls, and as soon as signs of growth are seen, give water freely, ht. 6 in. *The bulbs we offer having been collected while in growth, a few may therefore fail to flower the first season. Those planted outdoors should therefore be allowed to remain where planted so as to become established: on no account should manure be given.*.....per 100, 21/- 3 0 0 4

†**Yellow Hoop Petticoat (Bulbocodium conspicuus)** (2), flowers rich golden-yellow, of hoop-petticoat form and rush-like foliage, ht. 6 in. flowering from the end of February to early in March, it prefers a sandy peat soil with a fair amount of moisture while in growth, but dry in summer; no manure should be given...per 100, 12/6 1 9 0 2

Strong Home-grown bulbs ,, 21/- 3 0 0 4

NARCISSUS YELLOW HOOP PETTICOAT ON ROCKWORK.

Juncifolius (The Miniature Rush-leaved Daffodil) (4), a charming and elegant little species for pots or for select spots on rock-work; it has small graceful rich yellow flowers rather smaller than a buttercup, with a dainty flat little crown, ht. 3 to 4 in., flowers delicately fragrant, a native of the Pyrenees: no manure should be given when planting.....per 100, 35/- 5 0 0 6

Serotinus (5), a rare little Narcissus producing in October, on slender stems, miniature star-shaped flowers with silvery white perianth and minute golden-yellow cup. Sometimes two to three flowers on a stem, fragrant, ht. 10 in. Plant in a warm spot on rockwork and lightly cover during winter, or grow in pots in a cold frame.... 10 6 1 0

NERINES.

The most beautiful and easily grown Autumn-flowering bulbs for the greenhouse.

For autumn decoration in the greenhouse few plants can compare with *Nerines* for their brilliant and attractive colours, which form a pleasing contrast to the prevailing tints of this period of the year. The flowers, which are produced in umbels of 6 to 24 blooms, are borne on stout stems varying in height from 1 to 2 feet. In colour they range from *dark red*, *vivid crimson*, *cerise*, and *scarlet* to *salmon*, *coral-rose*, *pink*, *blush*, and *white*, many having a glistening lustre which in sunlight gives them the appearance of being dusted with gold or silver. In some cases the flowers have a well-defined bar or stripe running up the centre of the petal, which adds to their charm.

They remain decorative for many weeks, and their beauty may be enjoyed in a sitting-room as well as the greenhouse, if the pots are kept in a sunny window.

The cut spikes, which last fresh a long time, are greatly appreciated for table decoration associated with some light graceful foliage like that of Maidenhair Fern.

The varieties we offer below are mostly *New Seedlings*, comprising new shades of colour and new forms; they are freer bloomers, and in some cases of taller growth, and with larger flowers than many of the older kinds.

CULTURE.—*Nerines* can be very easily grown by anyone who has a glass structure from which frost can be excluded. *Plenty of air and sunshine* are their principal requirements. After the bulbs have finished flowering, place the pots in an airy sunny situation close to the glass, and encourage a free foliage growth by occasionally giving a little weak liquid manure. In April or May, when the foliage commences to turn yellow, cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

Nerines bloom most freely when well established in pots. Re-pot every third or fourth year, in August, using a 3½ inch pot, excepting for those varieties which make large bulbs, when an appropriate size pot should be used. In potting, put in plenty of crocks to ensure good drainage, and pot in a compost of good fibrous loam, coarse silver sand and well-decayed cow manure with a sprinkling of bone meal, well mixed.

Our *Nerine* Exhibits have been awarded by the R.H.S. Eight Silver and Silver-Gilt Medals.

Roweana, bright <i>coral</i> with <i>scarlet</i> stripe, <i>silver</i> dusted, large flowers with waved petals.....	10	6
Sarniensis (<i>Rose Guernsey Lily</i>), deep <i>rose</i> with <i>scarlet</i> glow.....	3	6
,, <i>Corusca major</i> (<i>Scarlet Guernsey Lily</i>), brilliant fiery <i>orange-scarlet</i> with protruding <i>scarlet</i> anthers, tall grower, free bloomer.....	3	6
Scarlet Beauty, brilliant <i>orange-scarlet</i> self, an exceptionally vivid and distinct colour, fine truss.....	15	0
Scintilla, glowing <i>crimson-scarlet</i> covered with glistening <i>gold-dust</i> , broad petalled, open flower, extra fine.....	21	0
Vieux Rose, charming shade of <i>soft-rose</i> with <i>chamois</i> glow, tall, vigorous grower.....	3	6

Two Grand New Hybrid Nerines.

These two wonderful Nerines were raised by Mr. James Rose, of Oxford, by crossing *N. Bowdeni* and a *N. Fothergilli Hybrid*. When exhibited at the R.H.S. Show on October 17th, 1922, they created a great sensation. One would hardly recognise them as Nerines owing to the large broad, Agapanthus-like foliage which accompanies the flowers, which are twice the size of an ordinary Nerine, and are produced in very large umbels on stout stems. On established plants the umbels carry as many as eighteen to twenty-four flowers. *Hera* comes into bloom about ten days before *Aurora*.

AURORA, flowers of great size and substance, *satiny rose* with *silvery lavender* stripe down centre of petals, borne in very large bold umbels, rising from a wealth of foliage. FIRST-CLASS CERTIFICATE R.H.S.....each £2 2s.

HERA, flowers of great size and fine form, brilliant *rose pink*, with a *deeper rose* stripe down centre of petals, borne in large umbels on stout stems, rising from a bold *fresh green* foliage; it blooms freely every year. FIRST-CLASS CERTIFICATE R.H.S.....each £2 2s.

Special Notices and Terms of Business.

Carriage of Bulbs—All Orders for Bulbs to value of 40s. (or 20/- if order is pre-paid) sent Carriage Paid to any Railway Station in the United Kingdom. These terms do not include certain manures, soils or tools. These will either be sent by goods train, carriage forward, or consigned at lowest rate and carriage charged on invoice.

5% Cash Discount on Bulb Orders of 40s. and upwards.—1s. in the £ discount is allowed for Cash with Order or for payment within 14 days from date of Invoice on all orders for bulbs of 40s. and upwards, with exception of the Collections offered on pages 3 and 4 which are nett.

Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett. Interest at the rate of 5% per annum will be charged on overdue Accounts.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "Westminster Bank." Small amounts may be remitted in Postage Stamps, or Coin in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.

Naming Daffodils.—Cut specimens of Daffodils sent to us for naming should be addressed to our Nurseries, Taplow, Bucks., accompanied by a remittance of 4d. per bloom to cover attendant expenses.

Catalogues.—Our Seed Guide is published 1st of January, List of Bulbs and Tubers for Winter and Spring Planting 1st of February, Hardy Plant Catalogue in February, List of Autumn-flowering Bulbs (Crocus species, Colchicum, etc.) in July, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

BARR'S GOLD MEDAL DAFFODILS

Daffodil Alice Knights.
The earliest white Trumpet Daffodil.

A most charming Daffodil either for early flowering in pots, for the Flower Border, or naturalising. The flowers are of medium size, perianth pure white, trumpet creamy white, of elegant form with prettily frilled open mouth: the flowers last well on the plant or as a cut flower. Award of Merit R.H.S. (See page 12 of catalogue.)
